***Election/Restrictions***

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 3, directed to the species of a second embodiment of a chain link is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

***Reasons For Allowance***

Claims 1-3 have been allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 1 recites the structural limitation of a conveyor chain link comprising "an angle of inclination is formed between said flat top surface of said link and a line which is tangential to said curved surface, said angle of inclination varies and becomes smaller as the distance from the central axis of said link increases in the direction toward a link side edge", in combination with the rest of the recite structure, clearly defines over the prior art.

The unique chain link structure, essentially varies the thickness of each front hinge portion, increasing the thickness of each front hinge portion from the central axis to both outer side edges, thereby creating a more flat top conveying surface when the links are traveling about a curved surface and thereby eliminating any vertical hinge or link edge movement that may disrupt the products being conveyed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
